

LAB OBSERVATION

CSA1522-CLOUD COMPUTING AND BIG DATA ANALYTICS

Student name: Dinnepa Sindhu Prasad
Register number: 192311271

EXPERIMENT 1:

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR FLIGHT BOOKING RESERVATION SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

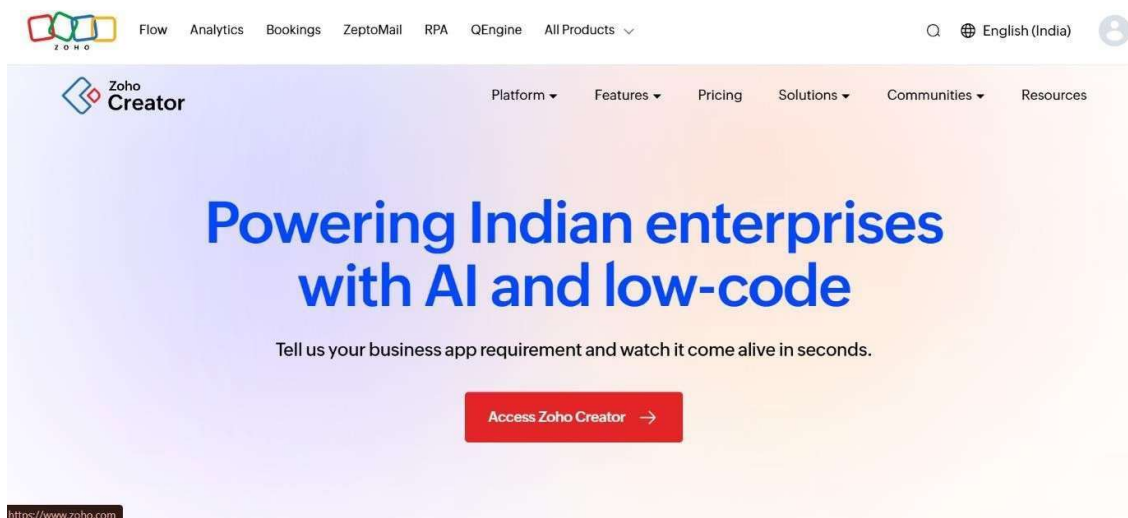

AIM:

To Create a simple cloud software application for Flight Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

STEP1:

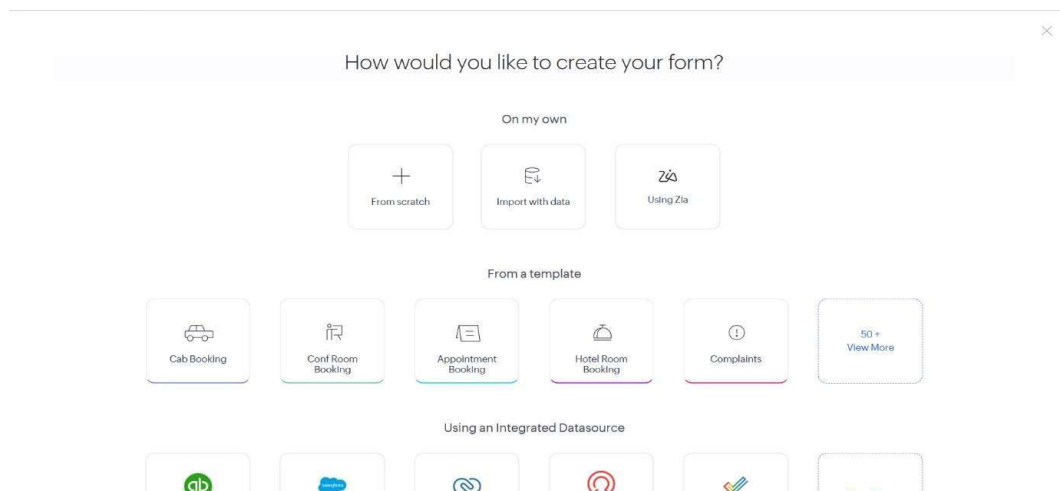

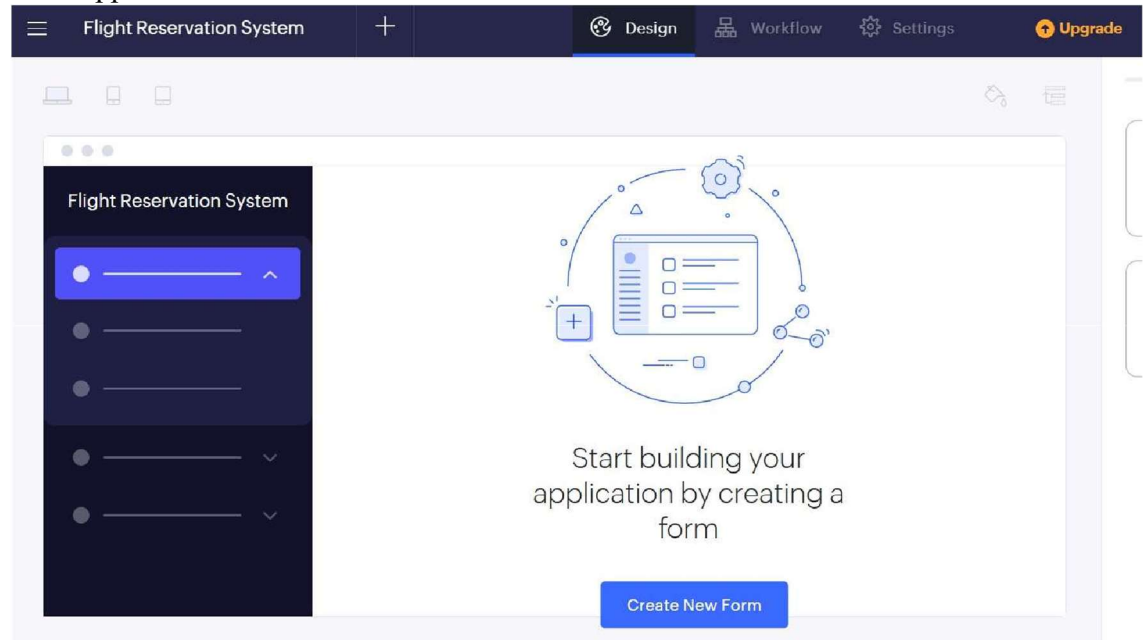

Log into zoho.com

STEP 2: Create new application from scratch

The image shows the "Create from scratch" form in Zoho Creator. At the top, there are two icons: a blue circle with a white square inside, and a white circle with a plus sign inside. Below these icons is the text "Create from scratch". The form has a light blue background. It contains a text input field labeled "Application Name" with a red asterisk, containing the text "Flight Reservation System". Below this is a checkbox labeled "Enable Environment" with a link "Learn More". At the bottom is a large blue button labeled "Create Application".

STEP 3: Create new application and create form from scratch

STEP 12: Create and display the Dashboard with important information and charts from the collected data.

EXPERIMENT 2:

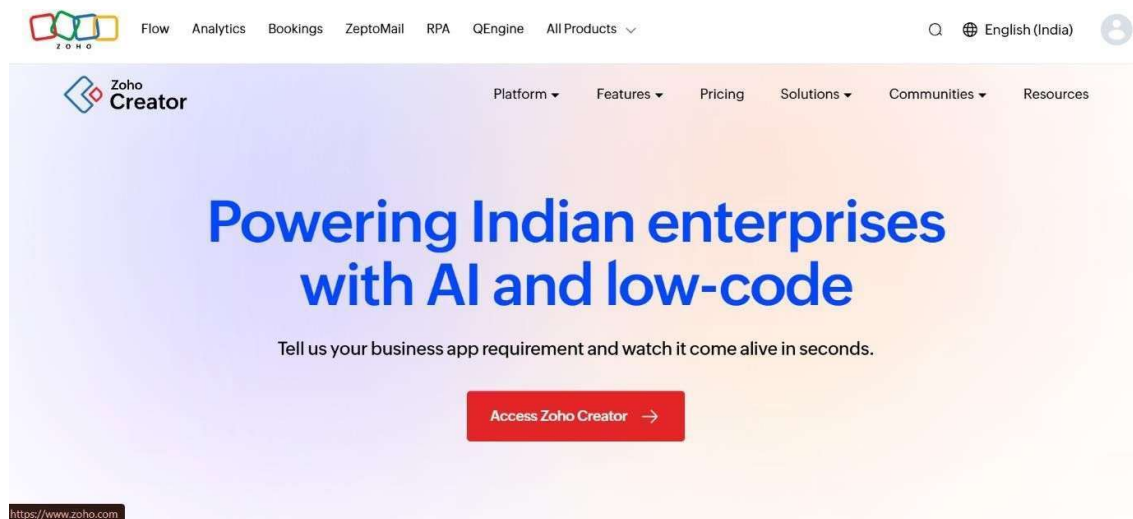

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS IN CHENNAI CITY USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

Aim:

To create a simple cloud software application for Property Buying and Rental Process in Chennai City using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

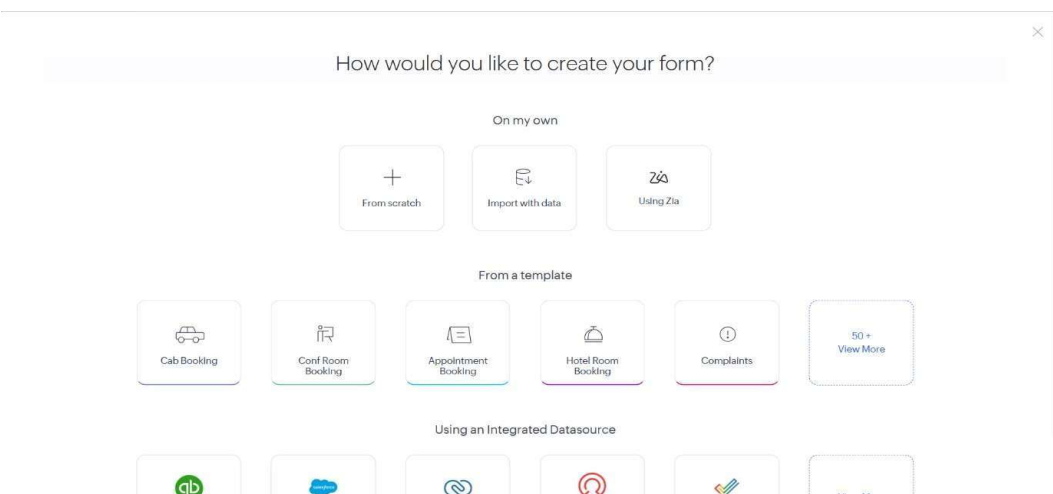

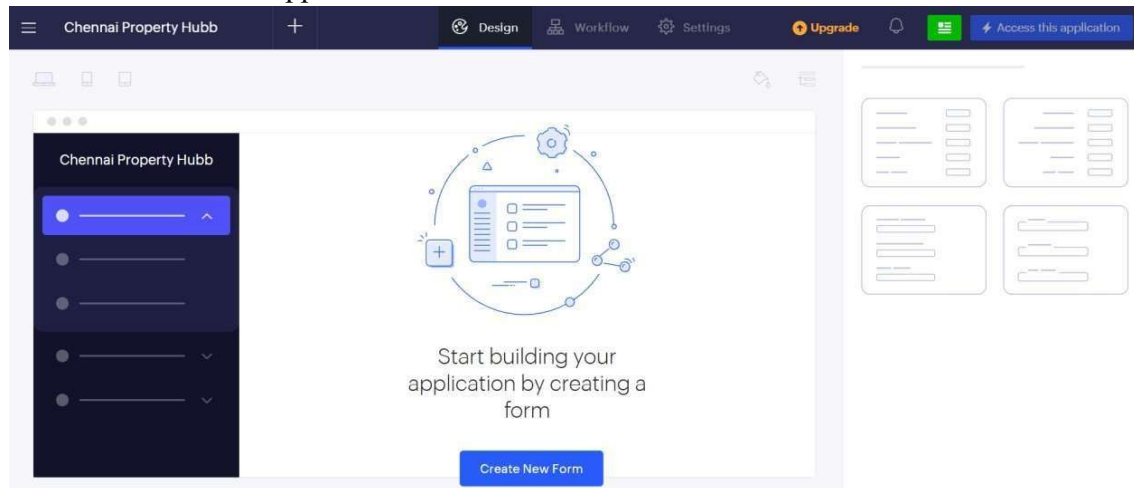

STEP 1: Log into zoho.com.

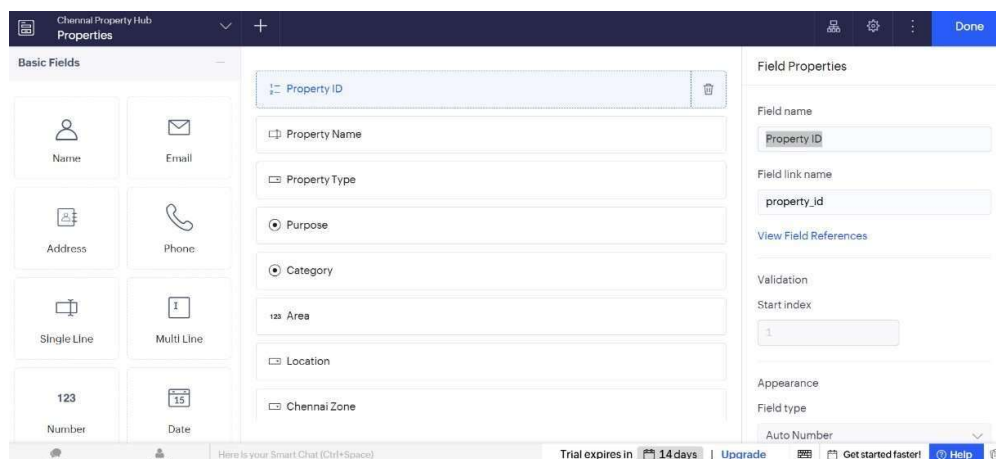

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the "Create from scratch" form in Zoho Creator. At the top, there are icons for "Create from scratch" (a blue circle and a white square) and "Create from template" (a white square and a plus sign). Below these icons is the text "Create from scratch". The form has a section for "Application Name" with a red asterisk indicating it is required. The text "Chennai Property Hub" is entered in the input field. Below the input field is a checkbox labeled "Enable Environment" with a link "Learn More" next to it. At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Property Form.

STEP 5: Create Customers Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Customers' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Customer ID, Customer Name, Gender, Mobile Number, Email, Address, Preferred Property Type, and Status.

Field Properties: This section shows the configuration for the selected field, 'Customer ID'. It includes the following properties:

- Field name:** Customer ID
- Field link name:** customer_id
- View Field References:** A link to view references.
- Validation:** Start index is set to 1.
- Appearance:** Field type is set to Text.

STEP 6: Create Property Search Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Property Searches' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Buy or Rent, Property Category, Preferred Location, Budget Range, Bedrooms, Furnishing, and Customer.

Field Properties: This section shows the configuration for the selected field, 'Buy or Rent'. It includes the following properties:

- Field name:** Buy or Rent
- Field link name:** buy_or_rent
- View Field References:** A link to view references.
- Choices:** A dropdown menu with 'Buy' and 'Rent' options. A note states: 'Renaming the choices will update the values in the existing records, if any.'

STEP 7: Create Rental Agreement Form.

The screenshot shows the 'Chennai Property Hub' interface for creating a 'Rental Agreements' form. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a 'Done' button.

Basic Fields: This section contains a grid of field types on the left and a list of fields on the right. The field types include Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The fields listed are Customer, Property, Agreement Start Date, Agreement End Date, Monthly Rent, Security Deposit, and Agreement Status.

Field Properties: This section shows the configuration for the selected field, 'Customer'. It includes the following properties:

- Field name:** Customer
- Field link name:** customer
- View Field References:** A link to view references.
- Display Fields:** A dropdown menu showing 'Chennai Property Hub -> Customers' and 'Customer ID'.
- Display type:** Multi Select.

The bottom of the interface shows a status bar with the following information: 'Trial expires in 14 days', 'Upgrade', 'Get started faster!', and 'Help'.

STEP 8: Create Property Bookings forms.

The screenshot shows the 'Property Bookings' form configuration in the Chennal Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a bottom status bar.

- Basic Fields:** A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. Below this grid, a list of fields is shown: Customer, Property, Buy or Rent (radio buttons), Booking Date, Advance Amount, Total Property Value, and Booking Status.
- Field Properties:** A panel on the right for configuring the 'Customer' field. It includes fields for 'Field name' (Customer) and 'Field link name' (customer). Below this, 'Display Fields' shows a breadcrumb 'Chennai Property Hub → Customers' and a dropdown for 'Customer ID'. The 'Display type' is set to 'Multi Select'.
- Status Bar:** At the bottom, it indicates 'Trial expires in 14 days' and provides links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 9: Create Feedback Form

The screenshot shows the 'Feedbacks' form configuration in the Chennal Property Hub. The interface is divided into three main sections: 'Basic Fields', 'Field Properties', and a bottom status bar.

- Basic Fields:** A grid of field types including Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. Below this grid, a list of fields is shown: Customer, Property, Rating, and Comments.
- Field Properties:** A panel on the right for configuring the 'Customer' field. It includes fields for 'Field name' (Customer) and 'Field link name' (customer). Below this, 'Display Fields' shows a breadcrumb 'Chennai Property Hub → Customers' and a dropdown for 'Customer ID'. The 'Display type' is set to 'Multi Select'.
- Status Bar:** At the bottom, it indicates 'Trial expires in 14 days' and provides links for 'Upgrade', 'Get started faster!', and 'Help'.

STEP 10: Add sample data to all the created forms.

The screenshot shows the 'Property Bookings' form in the Chennal Property Hub with sample data entered. The interface includes a sidebar with navigation links and a main form area.

- Sidebar:** Contains links for Dashboard, Property Bookings (selected), Property Bookings ..., Board, Rental Agreements, Feedbacks, Customers, Property Searches, and Properties. The user 'Kanmani Log...' is logged in.
- Form Fields:**
 - Customer: 1 x
 - Property: 4 x
 - Buy or Rent: ☒ Rent (Other options: Buy, Other)
 - Booking Date: 28-Jul-2026
 - Advance Amount: 20000
 - Total Property Value: 100000
 - Booking Status: Confirmed (dropdown menu)
- Buttons:** 'Submit' and 'Reset' buttons are at the bottom.

STEP 11: Create reports to display the data entered in the respective forms.

STEP 8: Create Feedback Form.

The screenshot shows the 'Feedbacks' form creation interface. On the left, a 'Basic Fields' panel contains icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, and Date. The main workspace shows a search bar with 'Student' and three input fields: Rating, Comments, and a '2/4' indicator. On the right, the 'Field Properties' panel shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display type' as 'Drop Down'. The bottom status bar indicates a trial expires in 14 days and includes links for Upgrade, Get started faster!, and Help.

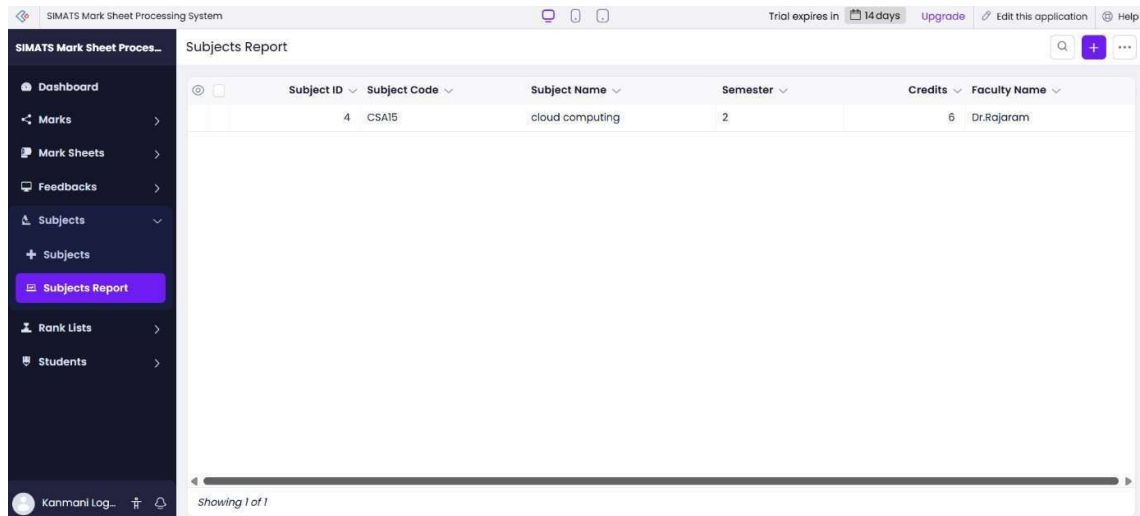

STEP 9: Create Rank List Form.

The screenshot shows the 'Rank Lists' form creation interface. The 'Basic Fields' panel is the same as in the previous step. The main workspace shows a search bar with 'Student' and three input fields: Percentage, Rank, and Academic Year. The 'Field Properties' panel on the right shows 'Field name' as 'Student', 'Field link name' as 'student', and 'Display type' as 'Drop Down'. The bottom status bar is identical to the previous screenshot.

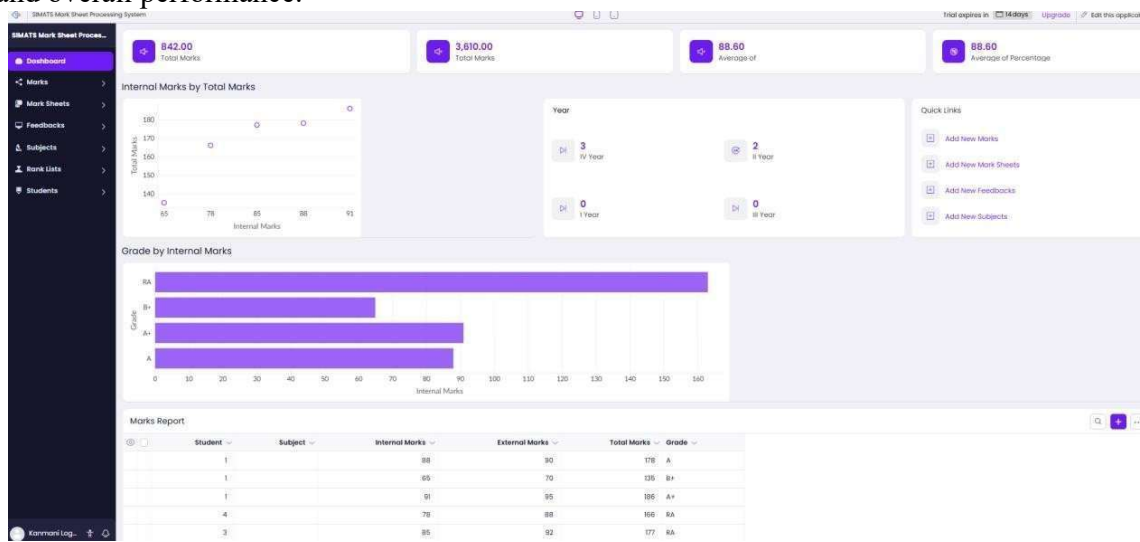

STEP 10: Add sample data to all the created forms

The screenshot shows the 'Subjects' form in the SIMATS Mark Sheet Processing System. The left sidebar contains a menu with options: Dashboard, Marks, Mark Sheets, Feedbacks, Subjects (selected), Subjects Report, Rank Lists, and Students. The main form area has fields for Subject Code (CSA15), Subject Name (cloud computing), Semester (2), Credits (6), and Faculty Name (Dr.Rajaram). At the bottom, there are 'Submit' and 'Reset' buttons. The top status bar shows the system name and window controls.

STEP 11: Create reports to display the data entered in the respective forms.

STEP 12: Create and display the Dashboard with student marks, average, percentage, rank, and overall performance.

EXPERIMENT 6:

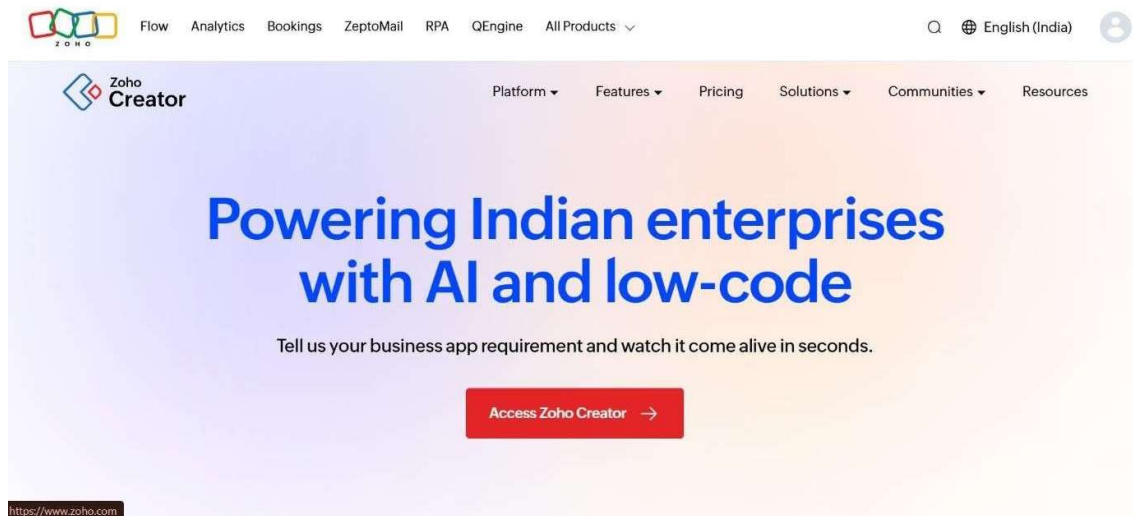

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR PAYROLL PROCESSING SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

EXPERIMENT 7:

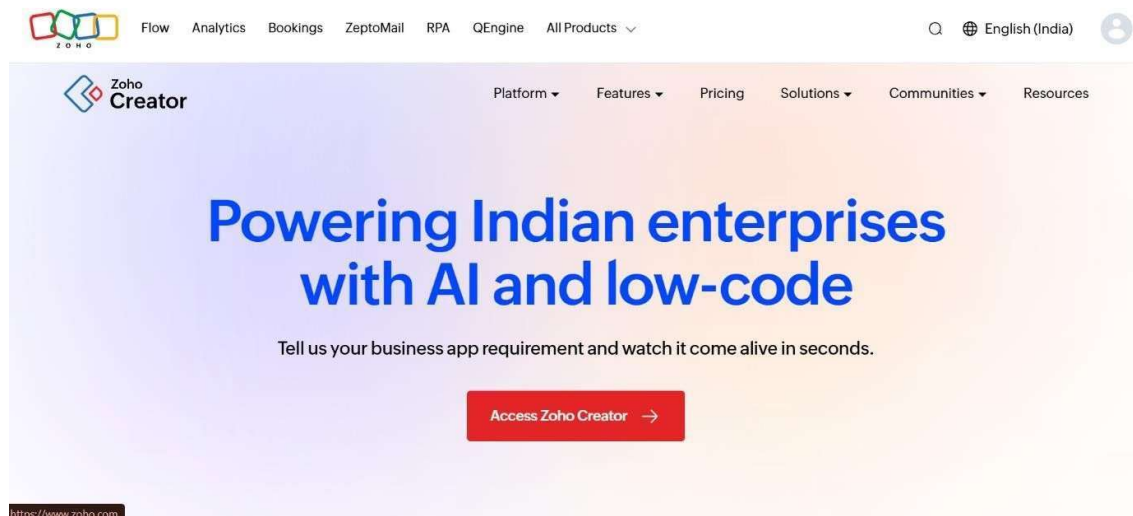

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION FOR STUDENTS ATTENDANCE SYSTEM USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application for Students Attendance System using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

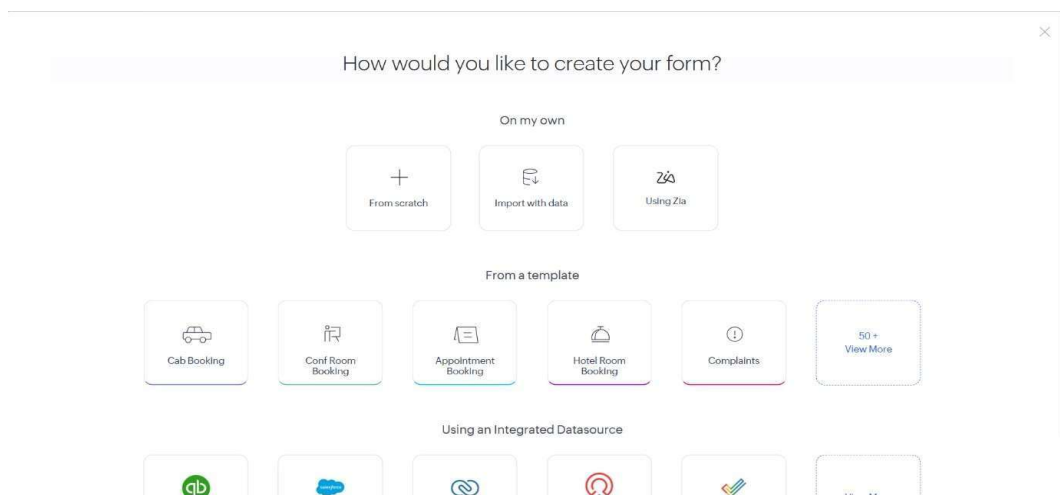

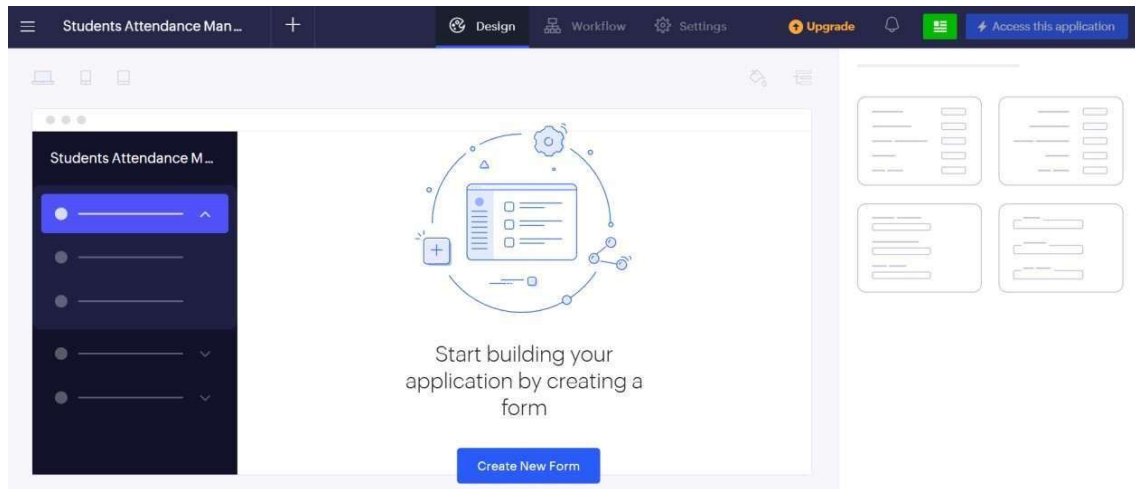

STEP 1: Log into zoho.com.

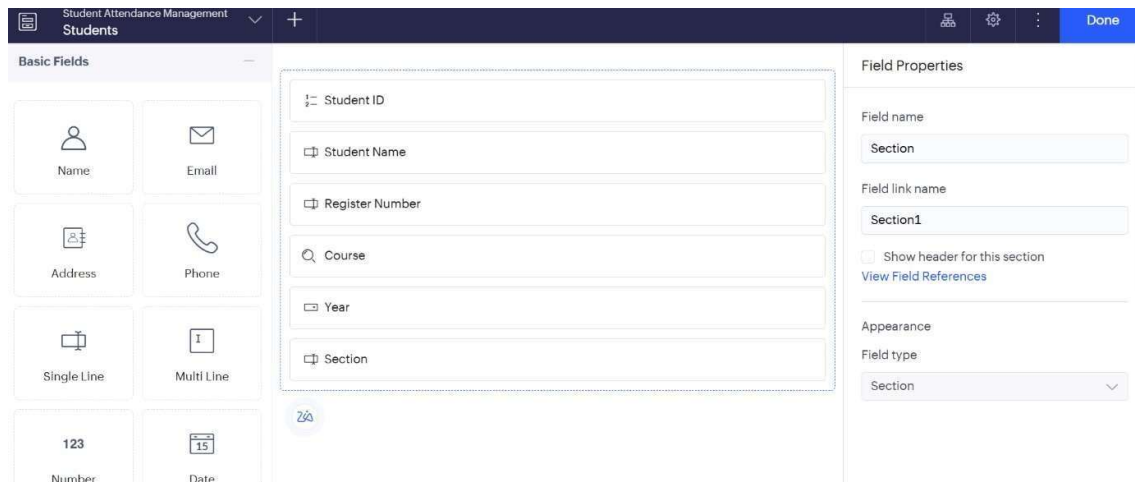

STEP 2: Create a new application from scratch in Zoho Creator.

A screenshot of the "Create from scratch" form in Zoho Creator. At the top, there is a header with a blue circle icon and a plus sign, and the text "Create from scratch". Below this, the form has a section titled "Application Name *" with a text input field containing "Students Attendance Management System". Underneath the input field is a checkbox labeled "Enable Environment" followed by a link "Learn More". At the bottom of the form is a large blue button labeled "Create Application".

STEP 3: Create a new application and create forms from scratch.

STEP 4: Create Student Form.

STEP 5: Create Course Form.

CREATE A SIMPLE CLOUD SOFTWARE APPLICATION TO RUN A C PROGRAM TO DISPLAY THE STUDENT INFORMATION USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE SAAS.

AIM:

To create a simple cloud software application to display Student Information using any Cloud Service Provider to demonstrate SaaS.

PROCEDURE:

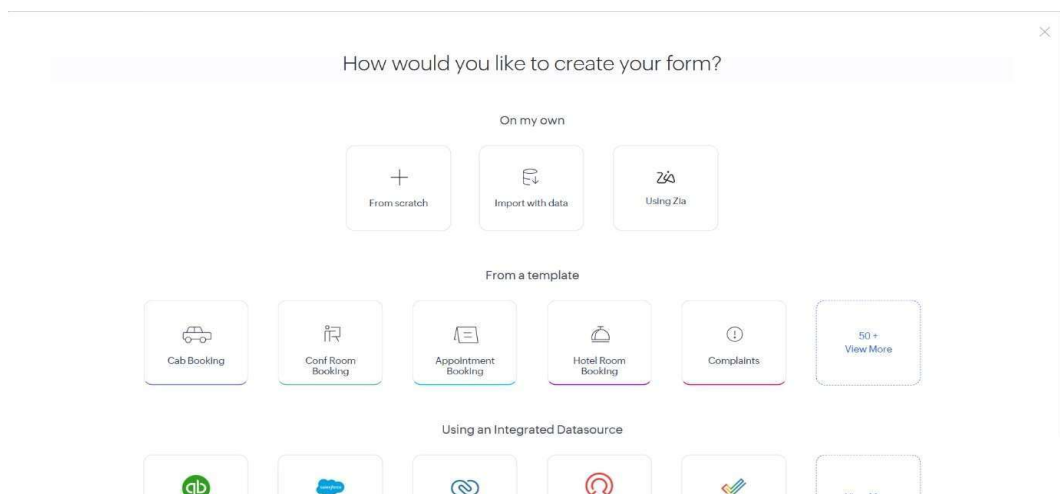

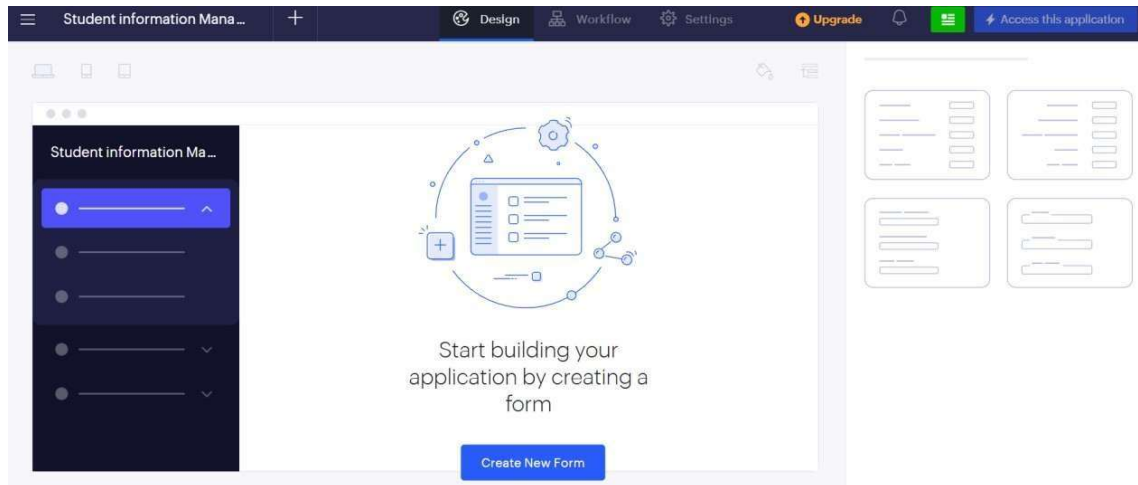

STEP 1: Log into zoho.com.

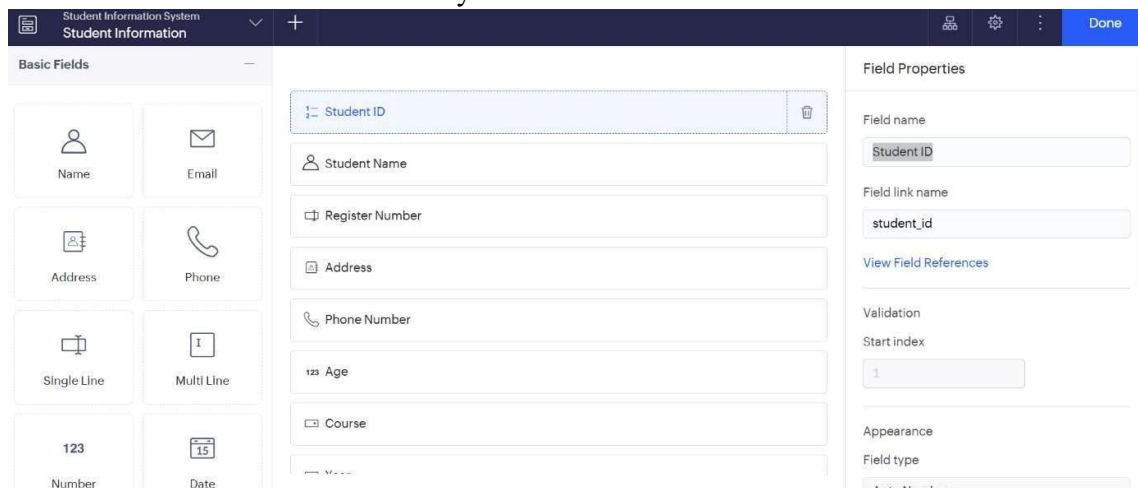

STEP 2: Create a new application from scratch in Zoho Creator.

The image shows the 'Create from scratch' form in Zoho Creator. At the top, there are four icons representing different app types: a blue circle, a white square, a white circle, and a white square with a plus sign. Below these icons is the text 'Create from scratch'. The form has a light purple background. It contains a label 'Application Name' followed by a red asterisk, indicating it is a required field. Below the label is a text input field containing the text 'Student information Management System'. Underneath the input field is a checkbox labeled 'Enable Environment' followed by a blue link 'Learn More'. At the bottom of the form is a large blue button with the text 'Create Application' in white.
